Bockstael Construction

Final Project Cost:
\$1,500,000

Project Description

Cambrian Credit Union was established in 1959. Since then, they have grown to be one of the largest credit unions serving the Winnipeg and Selkirk marketplaces. This new credit union was completed in 2007 and is located with direct access to a controlled intersection and replaces an existing branch. The building is a 6,000 square foot neighborhood-bank branch featuring floor to ceiling exterior glazing, laminate wooden crossbeams and a drive-thru ATM that when combined creates a convenient, professional and modern banking atmosphere. The open layout is well lit with natural light welcoming you to the spacious teller counter. There is a drive-thru teller service and office space for 10 staff.

Cambrian Credit Union has a design and development philosophy for building new and innovative brands for their branches. The architectural design integrates with the mechanical and electrical systems to reflect the credit union's new approach to meeting the client's requirement in a modern state-of-the-art facility.
