Project Description

Located in Airdrie, Alberta, this elementary/junior high school is home to over 600 students. MCW Hemisphere Ltd. was the mechanical engineer for this project and provided both design and contract administration services covering the entire scope. Mechanical features of this school include a 2 boiler, hot water heating system, heat exchangers to supply glycol coils with the air handler units and other sustainable designs relating to energy use and water conservation. This building received LEED® Silver Certification.
